NEW PARTS FOR FRS / BRZ / 86

CUSCO VSC Canceler Module

965 736 A - \$534 MSRP

This unit defeats the VSC at initial state of vehicle power up, eliminating the need for the driver to switch the system off, each time. For cars that need the system off for most of the use, such as on a dedicated competition vehicle.

- Cancel VSC & TRC with active ABS
- One push operation
- Remain active after restart
- OBD2 plug in
- Activation not limited by coolant temperature
