<https://parts.subaru.com/> (Please check the fitment on your model)

[Included] CUSCO Rear Differential Mount x1
 Washer x2 (Please refer to following instruction if you need to use this washer or not.)

[Instruction]

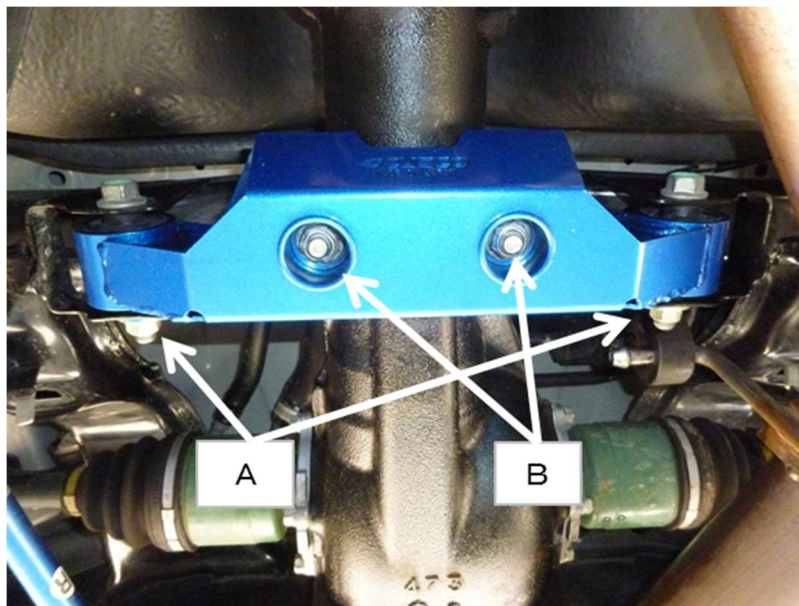

1. Remove OE Differential from the vehicle
2. Check the height of mounting area as showing below. Subaru has two different types of rear differential mount.

Case A: Require to use supplied x2 washers

Case B: **Not** require to use supplied x2 washers

3. Install CUSCO Rear Differential Mount on the Vehicle as shown below. Please use x2 supplied washer to fill the gap if your case was "A".

Tightening Torque: A 110 N-m / 81 ft-lbs
 B 50 N-m / 37 ft-lbs.

***Recommend to use new OE nut due to the nut is not re-usable per factory manual.

A: Subaru Genuine Part # 902330008

B: Subaru Genuine Part # 023512000

4. Please check if the nut was not loosened after test drive.
